How to write slides

Split pages by horizontal ruler (`---`). It's very simple! 😊

```
# Slide 1
```

```
foobar
```

```
---
```

```
# Slide 2
```

```
foobar
```

LaTeX

$$ax^2 + bx + c$$

Exemplo imagens 1

(two images on the right,
appear as two slices. each slice
is the 25% of the slide width)

Exemplo imagens 1

(same of above, but image is 33% of the slide)
